COMPANY PROFILE

Performance Friction® brake calipers, discs and pads are manufactured in our state of the art production plant located in Clover, South Carolina. With world-class manufacturing processes in place, our 200,000 square foot, 400 plus employee facility supplies major automotive retailers, thousands of workshops and vehicle manufacturers in domestic and international markets. With offices in Europe, Australia, Mexico and Japan, Performance Friction® is able to stay connected to its customers around the world.

(Europe, Middle East and Africa) region, from a 7,000 square foot facility, holding stock of over 2,000 product lines.

At Performance Friction®, every employee has "passion for the product." And It Shows...

Performance Friction® continues to be the market leader wherever drivers demand unrivaled performance and quality, No Compromises™.

Our brake calipers, discs and pads outperform the competition in all markets, from professional racing to commercial fleets.

Street - It's Quieter, Stops Quicker and Lasts Longer. At Performance Friction® we don't just

copy OE, we make it better. Whether you're driving a sports car, saloon, truck or recreational vehicle, we make application specific Z-Rated® Big Brake Kits, Carbon Metallic® brake pads and OE direct replacement Direct Drive™ discs. Our range of two-piece discs last longer and reduce vibration caused by thermal distortion and warping.

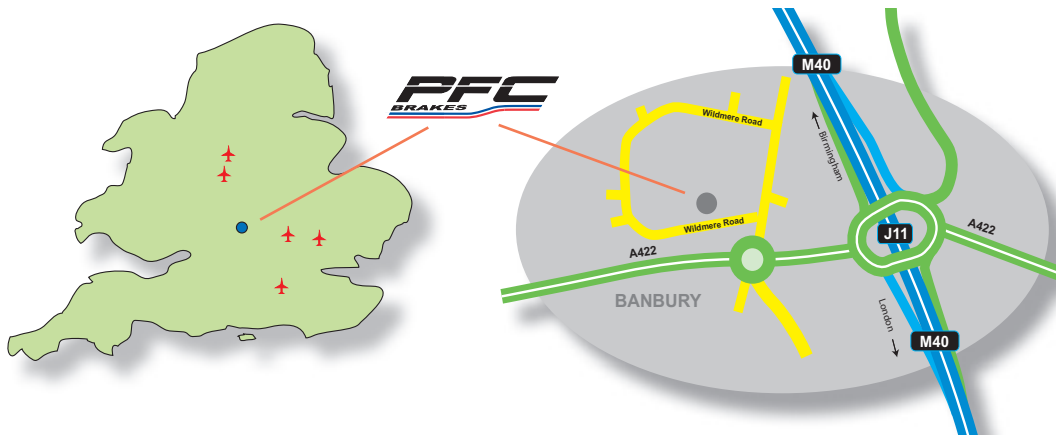

Fleet and Off-highway - Lower Cost Per Mile. Many leading operators rely on Performance Friction® discs and Carbon Metallic® brake pads to deliver the lowest cost per mile and highest durability in the industry. In the off-highway market Performance Friction® was the first brake pad supplier to produce an asbestos-free solution to stop a 300-ton truck at 35 mph.

Z-Rated® - It's Quicker, It's Cooler, It's Patented. Every year hundreds of major championships around the world are won with Performance Friction® Z-Rated® calipers, Direct Drive™ discs and Carbon Metallic® pads. What's our secret? No single attribute makes us the best. We engineer our calipers, discs and pads to work together as a system to give drivers superior control, the lowest lap times and unrivaled reliability.

Performance Friction UK is the sales, distribution and technical support centre for EUROPE, providing assistance to a network of regional distributors throughout the EMEA

HOW TO FIND US

Our European Headquarters located at Banbury in Oxfordshire is extremely well serviced by road, rail and air transport.

Performance Friction Europe

PAD PROFILES

MOTORCYCLE PAD COMPOUNDS

95

**COMPOUND
PROGRESSIVE FEEL**

Riders such as Shane Byrne use 95 compound for its excellent release and moderate initial bite, which yields a more progressive feel. Excellent controllability with a slight torque rise for a more balanced suspension at high corner entry speeds. Virtually fade free with excellent wear rate. 95 compound can be used on either stainless steel or iron discs.

13

**COMPOUND
MAXIMUM BITE AND MAXIMUM TORQUE**

13 compound is the choice for riders who desire maximum braking performance and torque. 13 has the highest initial bite of all PFC motorcycle compounds combined with a progressive torque rise with temperature. Initial bite is managed along with feel and control, as to not upset the suspension and allow a smooth transition between the brake and throttle

.10

**COMPOUND
MAXIMUM BITE AND MAXIMUM TORQUE**

PFC's new .10 Z-Rated street compound offers the highest performance for the street for any application. PFC's Z-Rated compound was the first to gain European ECE Regulation 90 approval from any brake manufacturer for motorcycle applications. Excellent and consistent performance in both dry and wet conditions for all riders.
