

CarbonMetallic®

331 ENDURANCE RACE BRAKE PADS

331 compound

Friction vs temperature

331 is the next generation of PFC endurance material.

The 331 Carbon Metallic® compound has been developed with higher initial bite than PFC's renowned 08 endurance compound.

The 331 has improved release, and continues to offer exceptional control & feel.

It boasts low wear rate & exceptional disc conditioning.

Applications: Endurance pad for front axle with ABS, GT3, GT4, Touring car and Trackday

At Performance Friction® every employee has "passion for the product" ... and it shows ...

PFC Brakes continues to be the market leader wherever drivers demand unrivalled performance and quality – No Compromises™.

Our brake calipers, discs and pads outperform the competition in all markets, from professional racing to commercial fleets.
