

11 compound

Friction vs temperature

11 compound is a new generation sprint and medium distance friction providing the ultimate in control, with superior disc conditioning.

11 compound was developed from the 01 compound with improved bite, modulation, and release characteristics.

It is ultra-smooth and developed to reduce wheel locking at the end of a stop.

For many applications, 11 will replace the venerable 01 compound.

Applications: GT, All Formula, Rally and Rally Raid, Historic Racing, Trackday, when pedal feel is needed. Preferred compound choice for one make series.

At Performance Friction® every employee has "passion for the product" ... and it shows ...

PFC Brakes continues to be the market leader wherever drivers demand unrivalled performance and quality – No Compromises™.

Our brake calipers, discs and pads outperform the competition in all markets, from professional racing to commercial fleets.
