

# Z-rated compound

Friction vs temperature

Z-Rated compound has been developed for fast road / track day applications.

It provides more stopping power and increased fade resistance over the standard OE materials but retains the good qualities of the road pad i.e., low dusting and noise along with low wear rate.

- High performance compound, gained through competition pad developments
- Compound designed for low dusting qualities
- Several built in noise suppression technologies
- Excellent disc conditioning, giving even transfer layer on disc to reduce uneven pad deposits.

Typical applications: This compound can be used in OE calipers or aftermarket brake kits in applications where an increase in performance is required over the standard OE friction material.

At Performance Friction® every employee has "passion for the product" ... and it shows ...

PFC Brakes continues to be the market leader wherever drivers demand unrivalled performance and quality – No Compromises™.

Our brake calipers, discs and pads outperform the competition in all markets, from professional racing to commercial fleets.
