

CarbonMetallic®

95 PROGRESSIVE FEEL BRAKE PADS

95 compound

Friction vs temperature

95 compound has progressive feel and high torque. Multiple championship-winning riders such as Carl Fogarty, Shane Byrne and John Reynolds use 95 compound for its excellent release and moderate initial bite, which yields a more progressive feel. Excellent controllability with a slight torque rise for a more balanced suspension at high corner entry speeds. Virtually fade-free with excellent wear rate. 95 compound can be used on either stainless steel or iron discs. Perfect for fast road use or track day.

Applications: Superbikes, superstocks, Café Racers, Racing Naked, Racing Maxi Scooter, on- and off-road trail applications, heavy tourism bikes, track days, circuit and on- off-road.

At Performance Friction® every employee has "passion for the product" ... and it shows ...

PFC Brakes continues to be the market leader wherever drivers demand unrivalled performance and quality – No Compromises™.

Our brake calipers, discs and pads outperform the competition in all markets, from professional racing to commercial fleets.
